

Michigan Gourd Artist, Crafter's, Grower's Guild

**Are you looking to learn more about gourds
as an art form, craft or growing?**

**Then maybe you should come see what
The Michigourders are all about!**

Who are The Michigourders?

We are a group of Artist, Crafters, Woodcarvers and Growers who love working with Gourds. Located in southeastern Michigan we meet once a month to work on projects, discuss the latest in gourd trends, up coming shows and events, but most of all spend a wonderful day with wonderful people and have a good meal at the same time.

The Michigourders was officially formed in 2003 and has steadily grown in membership over the years. The Michigourders.org web site was created as a way of passing along information on events and happenings with the group.

In 2010 we added a Michigourders Yahoo Group for our members to share ideas, ask questions and post information to share with other members not able to attend meetings.

Our goal is to enrich and inspire others to learn more about gourds and their use in the past as utilitarian objects, to present day as works of art and instruments used in every day life. We work to achieve this through attending shows, fairs, educational programs and special events. Our success comes from our creative leadership, willingness to share new ideas and respect of our fellow members.
